

RUBBER STAIR TREADS

Provides secure grip for more safety

Please read all instructions prior to installation

Spartar anti-slip rubber stair treads increase traction and grip on the stair, making it ideal to use at home-, office-, industrial-, and in public places. etc. indoors & outdoors. Designed with anti-slip protrusions on the surface, ensuring comfort on your feet and improving traction, protecting you from slipping when going up and down the stairs.

ATTENTION:

Prior to installation, place the rubber stair treads at a well-ventilated area for about 48 hours.

When you first unpack your mat, you may notice a natural rubber scent—this is completely normal, especially if you have a sensitive nose. Since the mats are rolled for shipping, they might also have some slight curling.

No worries! Here are a few easy tips to help your mat settle in and feel fresh:

Let it breathe: To reduce the natural rubber odor, simply place the mat in a well-ventilated area for about 48 hours.

Flatten it out: If your mat has any curls from being rolled, lay it flat at a place with corner and place some weights (like books or boxes) on the top for 48 hours!

Material: Made of high-quality rubber material, noise reduced, extremely durable, weather-, acid- and alkali-resistance, great wearing capacity.

Note: The rubber scent is safe, harmless, and will fade over time with proper ventilation.

SAFETY FIRST

Non Slip Stair Treads Provides Safety & Grip for Your Entire Family!

- ✓ Pre Cut Stair Treads To Fit Your Stairs
- ✓ Slip resistance for the whole family
- ✓ Protects and Decorates Your Stairs
- ✓ Suitable for Indoor & Outdoor Use

MAINTENANCE

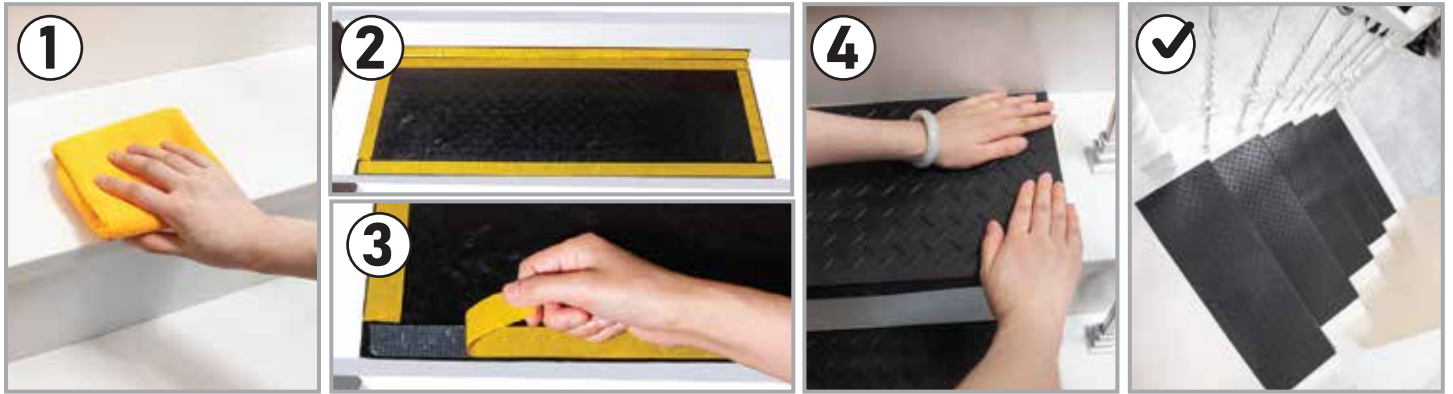

Spartar non-slip rubber stair treads are designed to provide step stability for daily ascents and descents of the stairs. The perfect solution for slippery stairs to avoid accidental slipping;

In daily use, please keep the stair treads as clean as possible to ensure max. grip of the protrusions on the surface;

Daily cleaning with an ordinary vacuum cleaner or wiping with a damp cloth is quick and easy;

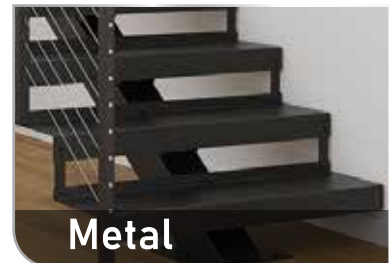

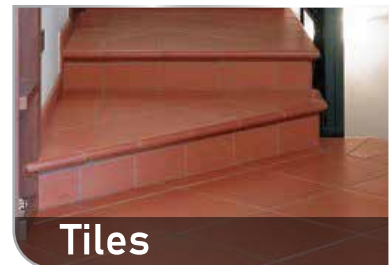

INSTALLATION

- 1** Before installation, the stairs must be cleaned. Sweep the stairs with a broom to remove dust & dirt, wipe clean and dry with a lint-free cloth.
 - 2** Lay stair treads on the stairs with the bottom facing up. Use the included adhesive tape to apply all the edges of the stair treads, including the front edge (nosing)
 - 3** Remove the yellow film. Apply the treads at the desired position aligned with the front corner to your stairs.
 - 4** Press firmly over the entire surface, especially the front edge (nosing), to ensure the stair tread is securely attached to the step. Walk the stairs carefully up & down to ensure the installation is secure.
- ! Permanent Installation (optional):**
For a permanent fix of rubber stair treads onto your stairs, apply rubber flooring adhesive(not included) onto the bottom of the stair treads. For installation instructions, please consult the rubber flooring adhesive supplier!

MUTI SURFACE COMPATIBILITY
